mToken PKI-based Identity Authentication Management

Technical Parameters

- Power supply : USB Port

- Working Voltage : 5 V (USB Chargeable)

- Working current : 50 mA

- Working temperature : 0 to 70 deg C

- Storing temperature : -20 to 85 deg C

- Casing Material : Metal/Plastic

- Communication : USB CCID

- Interface Standard : USB 2.0 High speed support;

                     compliant with 3.0

Number of Read/Write Cycles : At least 500,000

                     write/erase cycles

Data Retention : At least 10 Years

mToken PKI-based Identity Authentication Management

•Power Consumption : Less than 100mW Microsoft Smart

Card Miniiver Microsoft CryptoAPI and CNG

•Cryptography Standards Compliant : PKCS# 11 V2.20 X509

     v3 certificate storage SSL V3, IPSEC/KEC, PC/SC, CCID

•Suitable for multiple operating systems

•Smart Card Based

•On-Board Encryption processing

•Non-Repudiation Digital Signing

•Multiple Algorithms Employed

•Secure File System

•Self-Lock Capability

•Memory : 128KB EEPROM

mToken CryptoID –BLE Token

• mToken K5 is a smart card based wireless device

• Independent from PC connections.

• Designed for wireless terminal such as mobile, PC,
  embedded platform to ensure secure network
  authentication and communication encryption

•Bluetooth PKI based mToken is on the anvil.
