# DOWNLOAD DSC USING MOBILE PHONE

VSIGN™
Certifying Authority

# Downloading Digital Signature Certificate using Mobile phone

The App enables download of digital certificates across devices and platforms.

The App undertakes the CSR signing and download via an independent channel.

The App does not rely on any third party pre-requisites including tokens drivers

19 September 2022

# What Vsign via Mobile App Does

Creation of Public-Private keypair in FIPS compliant crypto tokens

Signing of CSR using the Private key from the Crypto token & Submission

Importing the Vsign issued certificate into the crypto token

19 September 2022

# Vsign Certificate Download Benefits Using App

Does not require a Browser to download the Certificate

The app works on an independent channel, CSR Signing and Download request are directly sent from CA portal to the mobile app.

No need to install token drivers, Java Applets, Plugins or any other third party utilities

Certificates issued via the mobile app are ready to use on various government 2 Citizen portals.
